[Doctor, Doctor...](#) Nov 14, 14:15 by Georgie Colbridge Cole

We've got Dr Brandt, Dr Hauschka, Dr Sebagh and NY Pericane MD to name but a few of the doctors, dermatologists and cosmetic surgeons who have brought out their own skin care brands of late.

The latest is [Steven Victor MD](#), a well-respected Manhattanite dermatologist whose brand, I am told, is not just another doctor's skin care line but instead, a luxury, intelligent and advanced scientific collection to satisfy even the most discerning of consumers!

So what's so special about Victor's new, so-called, ground-breaking range?

Well, each product contains multiple ingredient complexes that enhance or complement each other. Confused? Basically the formulations in some skin care ranges mean that they only contain one active ingredient so you still have to use other products alongside them to achieve multiple effects. Victor's multiple ingredient complexes mean you shouldn't have to use so many products - his range consists of just six.

If there's one thing you do for your skin, it should be to cleanse. Victor does an Anti-ageing Cleanser 120ml (4.1) that purifies, removes surface dirt, exfoliates, unclogs pores and improves the clarity of your skin.
